

EQUIPPING FAITH LEADERS TO RECOGNIZE
AND HELP YOUTH WITH MENTAL HEALTH ISSUES

Windows to Hope is a mental health conference designed specifically for faith leaders who work with children, teens and young adults. The conference features informative workshops presented by leading mental health professionals.

People who work with youth in places of worship are in a position to see when an individual is struggling with emotional or psychological issues such as anxiety, depression, trauma, self-harm, eating disorders, suicidal thinking, or substance abuse.

Windows to Hope will equip faith leaders to more effectively respond to the mental health needs of teens and young adults.
